

Agenda
FAA Workshop on Aircraft Noise Impacts
4 March 2010
After the ECO-AEROVISION Conference in San Diego, CA

The FAA Office of Environment and Energy is developing a comprehensive research roadmap addressing critical aircraft noise impacts research needs, in collaboration with and participation of researchers across numerous disciplines and around the world, as well as with the broad community of aviation stakeholders including the public. This workshop intends to bring together larger representation of various stakeholders already planning to attend the UC Davis conference, following the first roadmapping workshop held in December 2009. The purpose of the workshop is to present FAA's goals for the roadmap, to present the state of knowledge on aircraft effects on annoyance and sleep as well as the draft roadmap, and to solicit questions, concerns and ideas from the attendees regarding noise issues.

8:00 - 8:30 Registration

8:30 FAA Background, Objective and Timeline

9:00 Annoyance Research Roadmap

- Presentation and discussion of the Draft Annoyance Research Roadmap and Information Briefs on state of knowledge

10:45 Break

11:00 Continued Discussion of Annoyance Research Roadmap

12:15 Wrap-up and Next Steps

12:30 Lunch

1:15 Sleep Research Roadmap

- Presentation and discussion of the Draft Sleep Research Roadmap and Information Briefs on state of knowledge

2:45 Break

3:00 Continued Discussion of Sleep Research Roadmap

4:00 Wrap-up and Next Steps

4:30 Adjourn
